Companion Product (Open Blue Companion)   (September 20 - Till date)
Technologies   **:** Angular 8, .Net core, Web Api, GraphQL, C#, LINQ, SQL Server 2016,
                    Entity Framework, JavaScript, Jquery, CSS3.0.
Team Size   **:** 30
Client name   **:** JCI.

The purpose of a building is to bring people together: workers, managers, thinkers, doers, healers, teachers, learners—the list goes on. But the real magic happens when you bring people together and make them more productive, more creative, and more effective. That demands an environment that's comfortable and works for them. Now you can give your occupants the power to manage their surroundings with ease.

Introducing the Johnson Controls OpenBlue Companion App: an easy-to-use smartphone app that empowers the people who occupy your facility to handle all kinds of day-to-day building-related issues. From adjusting heating and lighting to scheduling conference rooms and facilities, the App gives occupants more control and makes your building smarter and more efficient.

Digital Factory (Digital Factory)   (July 19- August 20)
Technologies   **:** Angular 7, .Net core, MVC 5, C#, LINQ, SQL Server 2014, Entity Framework, JavaScript,
                    Jquery, CSS3.0
Team Size   **:** 5
Client name   **:** Gujrat.

The industrial world has been in the throes of digitization for well over a decade. Primarily through enterprise resource planning (ERP) and manufacturing execution systems (MES), critical planning, scheduling, warehousing, inventory management, and logistics processes have been automated and simplified. But these gains have been restricted to technology silos, supporting separate functions of the factory rather than improving the performance of the plant — and its extended supply chain — in a broader way.

<u>Canteen Management System (CMS)</u>   (March 18 – June 19)

Technologies	**:** Angular 7, Windows service,Crystal Reports, MVC 5, Highcharts, SQL Server 2014, C#,LINQ.
Team Size	**:** 6
Client name	**:** Serum.

Canteen Management system is a Canteen based system which stores the records of the employee who is using Canteen for Lunch and dinner, this software maintains the current balance amount of the employee, and his lunch and dinner details. This software is designed to cater the needs of all kinds of possible users e.g., factories, offices etc. To cater to the needs of the factories where Canteen is required to provide Canteen facilities to the employee.
